- 3) Changing the terms and conditions to bring this former American Airlines agreement into conformance with standard County/MDAD agreements.

MONETARY AND TIME JUSTIFICATION:

Construction Administration Services - \$610,896

American Airlines, Inc. (American) entered into this agreement on September 18, 2002 with Ross & Baruzzini Transportation Services, Inc. to design the Premise Distribution System (PDS) for the North Terminal Development (NTD) Program and to perform construction management services during the construction. The PDS will provide a new cabling infrastructure for the NTD which is required for all telecommunications systems to effectively communicate. It provides the physical connections for access to existing legacy systems, the wide area network and the Internet. It included the design of the fit-out of equipment rooms, cabling, racks and adapters that connect telephone wires within the building to each other and to external lines of the telephone company. It is a critical part of the functionality of the NTD.

On December 30, 2004, Ross & Baruzzini Transportation Services, Inc. was merged into the parent company, Ross & Baruzzini, Inc. This agreement was assigned to Miami-Dade County pursuant to the Fourth Amendment to the Lease, Construction, and Financing Agreement between American and Miami-Dade County and was approved by the Board on June 21, 2005 by Resolution No. R-735-05. Because of American Airline's contracting method of not fully funding an agreement for all of the required services and issuing change orders when services are needed, we are now in the process of fully negotiating and funding the full scope of the work.

American did not include the requisite funding in the agreement to perform the construction management portion of these services contemplating that it might have Turner-Austin Airport Team ("TAAT") assume this role. In February 2005, American, recognizing TAAT would not be providing construction management services for new NTD projects, issued a change order to R&B to provide for construction management services for the three PDS construction projects which were already a part of the original scope of the agreement, but not yet funded. The fee that was negotiated was for a 43-month period and provided funding for construction administration services through the end of 2008.

In looking forward it is important that we continue to employ the expertise of the company that designed the system for construction administration services including actual system and component testing to ensure that the PDS is installed as designed. Failure of a PDS system can greatly impact a project leading to delays and increased costs which MDAD and its business partners clearly want to avoid. Due to the extension of the overall program schedule, the services under this contract will need additional funding. The proposed amendment provides for necessary dollars to fund the construction administration services to complete the PDS installation in support of the North Terminal Development completion date of 2011. The staff being proposed for these services are existing employees of R&B who were involved in the design and have extensive PDS experience which is required as part of this project. As it is prudent that R&B perform the construction administration services through the end of the project, additional funds in the amount of \$610,896 are now needed.

Additional Services - \$55,206

MDAD's standard professional services agreements typically include an allowance account for additional services to cover scope changes that could not be anticipated at the time the design services were advertised and negotiated or for design changes necessitated when differing site conditions or other unforeseen conditions are encountered in the field during construction. Due to the complexity of the NTD Program, both types of scope and design changes have been encountered during the Program. The agreements as assigned by American to the County do not have an additional services allowance account. Although there is defined scope being added to this agreement, it cannot be concluded that this will be the last of the changes. Therefore, this amendment adds the contractual language to establish an additional services allowance account and \$55,206 funding for that account.

Reimbursable - \$10,000

Estimates were also provided by R&B for reimbursable, such as document printing, which could be expected for the added services. The estimates totaled \$10,000. When authorized by the County, reimbursable would be paid on documented actual costs to R&B.

Additionally, as this contract was based on standard American Airlines contract documents, many terms and conditions that are standard in MDAD/County contracts or are required by County ordinances and resolutions are not contained in this contract. This amendment adds the contractual language to bring this agreement into conformance with these standards. Specifically, this amendment:

- includes IG and IPSIG provisions;
- incorporates County limitations on reimbursable travel expenses;
- provides the County with the ability to incorporate federal contracting requirements into construction documents should projects become eligible for federal funding;
- conforms the design professionals' duties under the agreements with their duties specified in the construction documents.
- changes the indemnification wording to conform to Florida Statutes;
- incorporates requirements regarding document (plans and specifications) security pursuant to Florida Statutes 119.071(3)(b); and
- makes the contract subject to the laws of the State of Florida retroactively from the start of the contract. (Because the contract was originally with American, the governing law for this contract is Texas.)

The Design Professional may request the Contractor to resubmit such shop drawings, descriptive data and samples as may be required.

38.14. The Design Professional shall, at the request of the Owner, provide an analysis and review comments on claims. The attendees shall reach a consensus on the status of the draft application relevant to non-conforming work quality, incipient faults, percentage complete, and status of the record drawings. Any disagreements with the Contractor on the status of the work, insufficient substantiating data and summary/reporting inaccuracies should be resolved. Should any amounts remain in dispute they will be excluded from the Contractor's formal application.

38.16. In addition to the requirements contained in Article 9.18, the Design Professional when requested by the County shall participate in the Change Management Process to include proposal review with comments, negotiations, and the signing of the subsequent work order. The Change Management Process, and the timing of the included steps, shall be per the flow chart attached hereto as Attachment 1.

38.17. The Contractor will be provided a complete set of Contract Documents for recording as-built information. These Contract Documents will be kept on the job site at all times and all changes marked in red as the work progresses. The field representative will coordinate the review of as-built drawings/specifications at least weekly by the Design Professional. An as-built drawings/specifications review log will be signed by each Design Professional discipline representative attesting to its review of the as-built drawings/specifications. A copy of the log will be attached to the minutes of the weekly construction coordination meeting. The field representative will report on the status of the as-built drawings/specifications at the weekly construction coordination meeting. Upon completion of the work and prior to approval of the application for final payment, the complete set of as-built drawings/specifications will be delivered to the field representative.

38.18. Substantial Completion shall occur when the Design Professional issues a Certificate of Substantial Completion. The Contractor is entitled to Substantial Completion when only minor punch list items are pending, and when the Work can fully be used for the use for which it was intended.

38.19. Subsequent to Substantial Completion and before Final Completion, the Contractor will provide to the Design Professional a copy of the resultant punch list derived from the inspection of the work. The Design Professional shall review and provide comments as to the completeness of the list within five (5) calendar days.

38.20. The Contractor, the Project Manager, and the Design Professional shall conduct a joint warranty inspection nine (9) months after the date of the Certificate of Substantial Completion.
